

Scandinavian Turfgrass Variety Testing

Applications for 2023- 2026 testing period

- SCANTURF: Testing of varieties at 15-20 mm mowing height at three Scandinavian sites according to the testing protocol published on www.scanturf.org. For varieties of *Poa pratensis* and *Lolium perenne* optional testing for football-type wear tolerance is included.
- SCANGREEN: Testing of varieties on USGA-spec. golf greens at four Scandinavian sites, mowing height 3-5 mm. Optional testing on an experimental green at University of Minnesota, USA, at no further cost, is included.
